### REFLECTION SHEET

**Website** <http://school.discovereducation.com/brainboosters/>

A large number of resources are available that require children to think creatively. They've been split into different categories e.g. lateral thinking, reasoning, logic, word and letter play. They'd be useful for KS1 and 2 and can be adapted. Useful early bird work activities / MOS / beginning of a literacy lesson as a warm up.

**Website** <http://www.bubbledome.co.nz/activities/furkleStroyhWilliams>

An excellent website that asks chn to think very creatively. It includes writing based activities, invention puzzles, 3d objects. Could be used as a+t activity in FS / KS1. Nicely animated and presented in fun way for chn. It uses scamper style questions to encourage chn to think creatively and imaginately.

Some nice creative writing pieces could be written from this. Has resources for 41-46. (42 = bubblecats)

**Website** <http://www.kidpsych.org.oocina2.html>

A mixture of online games, some are more creative thinking than others! Quite 'problem solving' based. Encourage logical thinking. Fun and well animated.

**Website** <http://www.odysseyofthemind.com/curriculum.php>

Good classroom activities / planned lessons based around science encouraging creative thinking. May need to be adapted for KS1 / lower KS2.
